Why Six Sigma?

Competitive pressure is forcing the Organizations to look for the ways and means for improving their processes so that the Quality of the products and services improve, waste reduces and customer satisfaction increases.

Improved Customer satisfaction is the goal of Six Sigma. It cannot just happen. The methodology of Six Sigma aims at integrating all processes throughout the organizations to achieve customer satisfaction and thus ensuring business growth. Six Sigma Implementation Program covers a variety of processes related to manufacturing and services including, but not limited to, distribution operations, warehousing and inventory management, hospitality, health care, electronics equipment manufacturing, electronics component manufacturing, boiler industry to printed circuit board industry, banking to insurance business and what not.

Six Sigma Green Belts:

Six Sigma Methodology lays great emphasis on processes, but it recognizes people as assets. Green Belts are the team members of all improvement projects taken up within an organisation. Generally issues within function/departments are solved by the Green Belts.

Body of knowledge (BOK):

BOK is designed to meet the minimum requirements of the most of the **major** organizations from across a wide range of industries.

Program requirements:

Acquiring knowledge and demonstrating abilities to resolve live problem using Six Sigma approach. Participants have to undergo class work followed by examinations.

Target Participants:

Engineers/Managers/Executives from any functions, having any degree with working knowledge of data handling using MS EXCEL. **Participants should have subject mathematics at least 10+2 level.**

Faculty: Experienced faculty from Indian Statistical Institute.

Certificate: “Six Sigma-Green Belt” certificate will be awarded on successful completion of training and passing the Qualifying examination (MCQ type).

Program Details
